PROFESSIONAL SUMMARY_

I am a full stack developer with over 5 years front end experience and over 3 years of full stack experience.

On each team I worked with, I did the following:

- delivered ambitious features that "delighted users," and saved them time and money.

- enhanced older features by improving design / usability and performance.

- helped other developers better understand less-than-clear legacy code by adding comments and completing light refactoring of methods and processes.

- ensured bug fixes were fully tested and documented for other developers.

- developed internal tools, libraries and components that made development processes faster, easier and less prone to bugs.

- worked closely with UX to ensure new features met user needs and were technically feasible in light of the constraints we were under.

- actively engaged with QA teammates to ensure weekly builds were complete and testable.

- wrote documentation and tutorials, and conducted presentations to share knowledge with my team.

My teammates have described me as being:

- "enthusiastic," "methodical," and always adding to my skillset.

- "reliable" and "keen on the details" of my work.

- a "team player" with a "stellar attitude."

- "a critical resource in the large scale redesign of core areas of our product."

SKILLS_

JavaScript:
React
Vue
Node
AngularJS

Testing:
Jest and Mocha

PHP:
Laravel, WordPress

Database:
MySQL, MongoDB

Server:
Ubuntu, Nginx, Node

CURRENTLY HACKING ON_

In my free time, I am working on a personal budgeting application called Fudget, as well as a commercial application for self storage business owners. **Each project uses React, Express and MongoDB.**

I also have a successful YouTube channel where I share how I build things with Vue, React and Node.

EXPERIENCE_

FULL STACK DEVELOPER - REMOTE
DOUGLAS WEB DESIGN | MARCH 2018 - PRESENT

A sass application for self storage business owners.

- *Skills Used*: React / Redux, Node / Express, MongoDB, PHP, PassportJS, Stripe API, Google OAuth

- Developed features that save our users hundreds, if not thousands of dollars a month.
- Developed a REST API allowing our customers to easily take reservation requests from their WordPress sites.

FULL STACK DEVELOPER - PARTIAL REMOTE
BETTER SOFTWARE CO. | MAY 2016 - JUNE 2017

A saas application for small business owners.

- *Skills Used*: Vue / Vue Router / Vuex, AngularJS, PHP / Laravel

- Greatly reduced user friction with the Quick Order module -- a feature that allowed users to create orders, schedule services, create invoices, manage discounts and take payments all from a single page.
- Received **rave reviews** from customers for the Customer Grid feature -- a spreadsheet-like interface for managing customers and producing important reports.
- Gave users a clear view of the health of their business with a dashboard that exposed important business metrics around sales, revenue and customer acquisition.

LEAD WEB DEVELOPER
BETTER SOFTWARE CO. | OCT 2015 - APRIL 2016
- *Skills Used*: PHP, JavaScript, WordPress

- Reduced development time from over a week to less than 2 days.
- Saved the company hundreds of dollars in theme licensing fees.
- Trained junior developer.
